

FACT SHEET

Pools Prairie Superfund Site

Neosho, Missouri

May 1999

INTRODUCTION

On May 5, 1999, the United States Environmental Protection Agency (EPA), the Missouri Department of Natural Resources (MDNR), the United States Department of Defense (DOD), and Teledyne Industries, Inc., completed an agreement to address soil and ground water contamination at an area of the Pools Prairie Superfund site called the Quince Road Area. The Pools Prairie site is located in Neosho, Missouri.

QUINCE ROAD AREA

The Quince Road Area is located near the intersection of Highway 71 and Quince Road and includes the 900 Building, which was formerly part of Camp Crowder and Air Force Plant 65. Previous operations at the 900 Building include the Camp Crowder laundry, warehousing, and jet engine overhaul and testing. The building is currently owned by the Saberliner Corporation.

In 1997, EPA sampled the soil and ground water in the vicinity of the 900 Building and found elevated levels of trichloroethylene (TCE) and other volatile organic compounds (VOCs).

REQUIREMENTS OF THE AGREEMENT

The work required by the agreement is expected to begin later this year. EPA will use the information developed under this agreement to make decisions about cleanup actions necessary in the Quince Road Area.

ADDITIONAL INFORMATION
